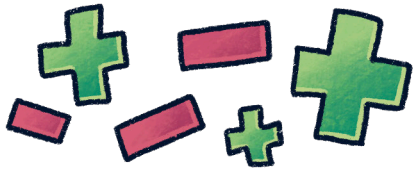
PROS & CONS LIST

Calculating what matters



How it works:

1. **Write Pros & Cons** in the spaces
2. **Assign point values** to each based on how important it is to you
3. **Count up points** in each column
4. **Circle result** with the most points

Boom! Decision made. *(Proud of you!)*

TRYING TO DECIDE: Should I make a pros/cons example?

One column having more list items doesn't necessarily mean it's the best option.
*Using points to signify **importance** gives you a better idea of where your priorities lie.*
